

Workshop

Subtitling for the deaf and hard of hearing

This hands-on workshop will introduce you to the fundamentals of subtitling for the deaf and hard of hearing (SDH). We will start with a brief theoretical introduction on the technical and linguistic characteristics of SDH and its target group, and then move on to practise subtitling using EZTitles, professional subtitling software. The workshop will be held in English, but is open to both Polish and English-speaking participants.

Agnieszka Szarkowska, PhD, is the founder and head of the Audiovisual Translation Lab, a research group working on media accessibility. Her main research interest lies in audiovisual translation, especially subtitling for the deaf and the hard of hearing and audio description.
